HANDLED PROJECTS

1)PROJECT NAME: Jama Service Plug in Enterprise Architect

PROJECT DESCRIPTION:

Jama Connect is centralized web application that helps you manage the development of new products. It manages all aspects of product development, including requirements, reviews and testing.

Collaboration with EA:

Enterprise Architect is a UML modelling tool – exporting an EA artifact into Jama web application using pro cloud server allows user to view it with in the Jama interface.

Support

- Export of element and package.
- Export diagram and bulk package.
- Export field and tagged values

2)PROJECT NAME: Visual studio extensibility extension in enterprise architect

PROJECT DESCRIPTION:

Developed a visual studio extension that includes with the EA app via a local API. The extension dynamically enables the EA app menu and allows users to seamlessly open specific element in EA app directly from visual studio by selecting corresponding elements in the IDE this integration streamlines workflows and enhances productivity by bridging development tasks with EA app functionalities.

MINI Projects

1.Calculator App

Description: Developed a calculator app using simple html, CSS, JavaScript.
